

Moving heavy loads safely and easily

Developed for perfect ergonomics:

Blickle ErgoMove

Product advantages in overview:

- Drive, steering and braking assistance for loads up to 4,000 kg
- Smooth movement no matter the trolley weight
- Comprehensive safety concept
- 24/7 operational
- Intuitive handling

The adaptive electric drive systems of Blicke: Moving loads up to 4,000 kg with the Blicke ErgoMove series

The Blicke ErgoMove series reduces health risks by requiring significantly less effort from the operator compared to manual pushing. The standard modular set consists of a cockpit with ergonomic handle, integrated control unit and exchangeable batteries, as well as two electrically driven fixed castors.

It also has all the relevant safety features. Existing and newly designed equipment, workshop trolleys and other electrified means of transport can be quickly and easily retrofitted thanks to pre-assembled components via plug & play.

1 Intuitive operating handle with power sensor

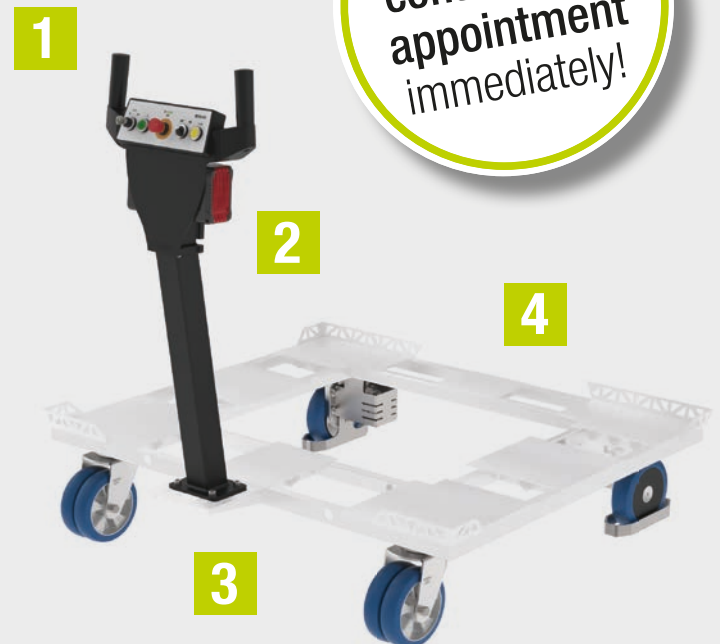

4 Drive, steering and braking assistance

2 Always ready for use due to the use of exchangeable batteries

3 Plug & Play
